Overview: When the homeowners first visited the community of Big Canoe, Georgia they immediately knew it was the perfect location for their retirement dream home. They fell in love with its beautiful mountain environment, which offered the perfect setting for their home that melds a respect for nature, with many custom features and modern amenities.

Need: During the warmer months, the homeowners enjoy spending time on their back porch, entertaining and taking in the spectacular views. To combat the biting insects, allow the cool breezes to flow through their home and preserve the unobstructed views they knew that traditional screens would not work.

Solution: The homeowners knew that Phantom Screens were the solution they had been looking for, allowing them to continue to get the most enjoyment from their porch, while maintaining the views of the natural beauty around them.

In order to maintain the architectural integrity, the Phantom Executive Screens were recessed completely out of sight. At the touch of a button, all of the screens are raised or lowered. The Executive Screens have made their porch a wonderful and enjoyable outdoor extension of this home.

The Serene Retractable Window Screens and Phantom Door Screens installed in the home are strategically located to preserve the clear views of the home's outdoor features. With the installation of Phantom screens this home seems to exist in harmony with its natural surroundings.
